Professional Summary

IT support specialist and software developer with hands-on experience in ERP system administration, CRM helpdesk operations, and end-user support — gained through a client placement at a major South African medical aid scheme via The Naked Scientists (TNS), Pretoria. Designed and built, as sole developer, the live WhatsApp and email helpdesk platform the scheme's member-support team works in daily. Holds a Diploma in IT (Sep 2025) and a Higher Certificate in IT Cum Laude from the Central University of Technology (8/10 distinctions). Equity partner at NexMotion Technologies with frontend delivery across 10+ live client websites.

Work Experience

ERP Support Technician Intern — Polmed *Apr 2026 – Present*

Placed via The Naked Scientists (TNS) · thenakedscientists.co.za · Pretoria, South Africa

- Built the scheme's WhatsApp and email member helpdesk platform end-to-end, from first commit to production — now the live system the support team uses daily to receive, answer, track and report on member queries.
- Delivered two-way WhatsApp messaging (media, quoted replies), email-to-ticket intake, a real-time ticket dashboard with role-based agent access, and SLA reporting with CSV/PDF export.
- Automated first-line triage (instant replies to common issues, after-hours messages) and built in POPIA safeguards: member details masked by default and old tickets anonymised automatically.
- First-line IT and CRM support across two tracks: ERP system administration for internal staff, and the member-facing WhatsApp helpdesk — triaging, resolving and escalating tickets within SLA targets.
- Resolved member queries: registration, OTP and password issues, card downloads and wellness onboarding.
- Administered Microsoft Dynamics 365 F&O user security roles (new users, role changes, sign-off documentation) and delivered onboarding and refresher ERP training.
- Diagnosed and resolved batch job failures; monitored recovery through the platform's administrative tooling.
- Coordinated UAT for the Polmed Connect mobile app across Android and Huawei devices; consolidated findings into issue trackers and change request reports for stakeholder distribution.
- Maintained process documentation to support triage, governance and operational continuity.
- Additional frontend support to the TNS product team across two confidential projects — UI modules, routing and navigation, and code audit fixes (React 18 · TypeScript · Vite · Tailwind CSS · Flutter).

Head of Product Engineering / Equity Partner — NexMotion Technologies *Mar 2025 – Present*

Bloemfontein, South Africa

- Central coordination node between CTO, CEO and Head of Marketing — bridging technical execution, UX and business strategy across all active client projects.
- Frontend development across 10+ live production websites for clients in legal, hospitality, construction, education and nonprofit sectors; portfolio at nexmotiontechnologies.co.za/projects.html.
- Led product feature scoping, visual design execution, sprint planning and client walk-in support.
- Visual design lead across the Pampiri product suite — all marketing assets, UI screens and brand output.

IT Intern (Volunteer) — Kinetixes Engineering Solutions (Pty) Ltd *Feb 2026 – Mar 2026*

Bloemfontein, South Africa

- General IT support: device setup, software installation, networking troubleshooting and on-site end-user assistance.
- Hardware diagnostics and repair — MacBook Pro motherboard-level liquid damage assessment, printer servicing and device configuration across Windows and macOS environments.
- WordPress website deployments and maintenance; Flutter + Firebase mobile app development for client projects.
- Built and deployed BidCalc using company resources and a domain procured by Kinetixes — a PWA for SA car auction buyers implementing the correct VAT model, verified against a real Aucor invoice and distinct from every existing calculator on the market. Installable on Android and iOS; fully offline via service worker; POPIA-compliant GA4 with

consent gating; Google Search Console verified. Stack: Vanilla JS · HTML5/CSS3 · PWA/Service Worker · GA4 · JSON-LD.

Educator Assistant (E-Cadre) — Toka Primary School *Jun 2025 – Nov 2025*

Freedom Square, Bloemfontein · Public primary school, Grades 1–7

- Provided hands-on ICT support to educators and learners — troubleshooting devices, setting up computer labs and resolving day-to-day technical issues across Windows environments.
- Developed digital literacy training materials to support educators in integrating technology into classroom instruction.

Work Integrated Learning (Software Developer) — Central University of Technology *Jun 2024 – Dec 2024*

- Built a cross-platform appointment booking system: Flutter + Firebase mobile app syncing in real time with a C# / ASP.NET web application.
- Collaborated on an internal inventory management system using C# and SQL; resolved 40+ UI/UX issues through systematic testing.
- Produced technical documentation (specs, user guides, architecture diagrams); participated in code reviews.
